

PARASECT ELEVAGE 3

BROAD SPECTRUM INSECTICIDE FOR ANIMAL PREMISES AND TRANSPORT EQUIPMENT

- **Efficient on all insects (flying or crawling)**
- **Quickly kills by contact or ingestion flies, mosquitoes, acarina, fleas, bugs...**
- **Shock and lasting effect.**
- **No habituation due to active substances combination.**
- **Registration N° 9600082 by the french Ministry of Agriculture**

PHYSICO-CHEMICAL CHARACTERISTICS :

- Blue limpid liquid, strong odour, flammable.
- Contains: Fenitrothion (100 g/L), Dimethoate (250 g/L) Xylene and Cyclohexanone.
- Density at 20°C : 1.032 ± 0,02.
- Flash Point : 44°C .
- Pale blue emulsion is obtained when mixed with water.
- ph of emulsion at 2% with water : 7.5
- Broad spectrum insecticide.
- Active on flying and crawling insects: cockroaches, ants, spiders, acarina, bugs, flies, mosquitoes, fleas, ticks, bugs, wasps, gadflies, woodlice...
- Active by inhalation, ingestion and contact.
- Shock and long lasting effect.

SAFETY / ENVIRONMENT :

- F: Flammable and Xn : Harmful.
- Oral LD 50 (rat) : 500 to 2000 mg/kg.
- Acute primary irritation : non irritant at 2% (1L / 50L of water)
- Avoid inhaling the fumes, do not smoke, drink nor eat during treatment, wash yourself thoroughly after using the product.
- Do not use in presence of animals, keep animals away for several hours after treatment.
- Drinking and feeding troughs must be rinsed with water after treatment.
- Do not spray on fodder.

- Registration n°9600082 by the French Ministry of Agriculture.
- Danger: please follow safety precautions.
- Keep the product in its original container and away from heat sources.
- Do not reject undiluted product in environment, try to use all the product at the recommended dosis).

INSTRUCTIONS FOR USE :

- Dilute 1L of PARASECT ELEVAGE 3 in 50L of water (for a radical treatment) and spray with PULBAN, PULDOS, electric ATOMIST or pressure machine for a 300 m² surface.
- For maintenance disinsectization : PARASECT ELEVAGE 3 is efficient at dosis of 1/500L of water.
- In distemping : dilute 1 L of PARASECT ELEVAGE 3 in 100 L of distemper for a 300 m² surface.

USERS:

- Disinsectization in domestic animal buildings : poultry sheep, cattle and stables (breeders, Indoor breeding, stud farms, kennels, zoos ...) .
- Disinsectization of transport and breeding equipment : vehicles, cages ... (veterinary clinics, disinsectization services, Veterinary Services Departments...)
