

# DOBOL MICROCAP

## APPROVED CONCENTRATED INSECTICIDE BASED ON BIFENTHRIN

- Immediate effect and high persistence (up to 6 months).
- The microencapsulation technology provides a regulated action in time, avoiding costly overdosing and reduces toxicity.
- Stable to UV and nonflammable.
- Easy and accurate dilution thanks to the pump dispenser.
- Efficient on all types of flying and crawling insects, mites, fleas, spiders, flies, mosquitoes, darkling beetles, cockroaches, lice.
- Do not stain, does not cause discomfort (odor low).
- Approval of the Ministry of Agriculture (AMM No2070124).

### PHYSICAL-CHEMICAL :

Milky white liquid, slightly fruity odor.

Density at 20°C : 1,0.

pH of the diluted product to 10 g/l : 6-8.

Packaged in bottles of 960 ml.

Dispersible in water.

Flash point : none.

### SAFETY / ENVIRONMENT :

Ingredients: Bifenthrin at 30 g/l CAS n° 82657-04-03

Harmful if swallowed.

Store in the original packaging, protected from frost.

Respect the recommended doses, avoid releasing the concentrated product in the environment, (try to use all the product at the recommended dosis). Packaging must be recycled through an authorized service provider.

### PROPERTIES :

Reduces the risk of possible resistance emergence.

High performance and long-acting product (up to 6 months).

Very wide activity spectrum on flying insects (servant,

stables, biting flies, wasps, hornets, mosquitoes, ...) and crawling insects (cockroaches, mealworms, ants, fleas), spiders, mites, red lice...

Efficacité constante, sur tous supports.

Directive biocide CE 98/8 : the active materials used in the formulation are reported in Appendix II).

Biocide used for PT 18 use (insecticides).

### INSTRUCTIONS FOR USE :

Dosis per 100 m<sup>2</sup> : 160 ml in 5 l water. Fill the sprayer with water, add the indicated dosage. Homogenize.

• Red lice: apply to floors, walls, ceilings, cracks, cages, carpets, one week before the end of the absence of animals.

• Darkling beetles : spray 2 days before the end of the absence of animals, during the building temperature put on again.

• Flies : treat 1/3 of the building total surface.

Spray until a slight trickle. Do not clean treated areas. Do not spray on electric equipments.

Restricted to professional use..
